

Fuel Types

Specific fuel requirements for 250cc International/250cc National/125cc Gearbox and 125cc Stock Honda Gearbox are listed below:

- Avgas 100/130 or Avgas 100LL
- Elf Unleaded
- VP Racing fuels CR99
- Powerplus 100+

Together with commercially available two stroke oil lubricants that produce two-stroke fuel. Entrants are permitted to choose their preferred fuel and lubricant.

Fuel Handling Procedures

Entrants supply their own fuel in approved drums or containers, up to a maximum of 60 litres and depending on class capacity.

These containers remain stored in the transporters until refueling is required.

All containers are sealed whilst being moved from transporter to garage.

Entrants are required to present a fire extinguisher of 900 grams minimum capacity as part of their pit equipment.

Flammable liquids signs and no smoking signs will be displayed in all pit garages/carports

Garages will be fully open to allow full ventilation for the dispersal of any fumes.
